DETAILED ACTION

Claim Objections

1. Claims 1 and 17 are objected to because of the following informalities: Claim 1 states the “the step of generating uses an I/O controller of the host adapter board”. There are two “generating” steps – “generating a clock signal” and “generating PCI signals” – so it is unclear which generating step uses an I/O controller.

Likewise, claim 17 states that “the means for generating includes an I/O controller of the host adapter board”. There are two “means for generating” – “means for generating a clock signal” and “means for generating PCI signals” – so it is unclear which means for generating uses an I/O controller.

Appropriate correction is required.

Allowable Subject Matter

2. Claims 1-4, 6-10, and 17-20 would be allowable if rewritten to overcome the claim objection. Please see the previous office action and applicant’s response for reasons for allowance.
3. Claims 11-16 are allowed. Please see previous office action for reasons for allowance.
